ADMIXCURE WP™

CONCRETE CURING COMPOUND – WHITE PIGMENTED

PRODUCT	Single part, ready to use concrete curing compound for fresh concrete surfaces, especially slope roof & vertical structures and concrete products.
BENEFITS	Single part - ready to use – can be applied by brush/spray – white in colour – does not form film – single coat application – water curing eliminated – cost effective – chloride free.
USES	ADMIXCURE-WP is designed as concrete curing compound for fresh concrete surfaces where water curing is not effectively possible such as slope roofs, vertical structures, concrete products etc.
DESCRIPTION	ADMIXCURE-WP is chloride free, liquid in nature, specially formulated for concrete curing purposes. It reacts with free lime and seals the pores completely thus reducing water evaporation which assists excellent curing process. In excessive heat or dry wind weather, ADMIXCURE-WP applied area may be covered with polythene sheets for additional benefits.
PACKING & COVERAGE	Available in 200 kg plastic barrels. 50 to 60 sft per 1 Kg of ADMIXCURE-WP with single coat application.

SHELF LIFE	12 months if stored in original container under shade.
PRODUCT PROPERTIES	<p>Colour : White Appearance : Liquid S.Gravity : 1.115 – 1.120 Standard conforms to : ASTM C309 Drying time: Typically dries in two hours, depending on work site condition (temperature & wind). Restrict foot traffic for at least four hours. Water Loss: Water loss after curing compound application is negligible. However water loss during the initial setting time just before curing compound application may be around 5 to 7 % which has no side effect so far as the required strength is concerned.</p>
ADDITIONAL INFORMATION	ADMIXCURE-WP should be stirred well before every use and stir frequently during application.
QUALITY ASSURANCES	CCI Inc., is an ISO 9001-2015 certified company and our products are in accordance with international standards.
